JOURNAL OF RESEARCH IN SCIENCE TEACHING

Contents

Volume 13, 1976

ISSUE 1, JANUARY

Research Papers

- Instructor Attitude Transfer in a Preservice Institute: *C. G. Adler and J. W. Byrd* 1
- Students' Perceptions of Science Conceptual Schemes Using Categorical Analysis Procedures: *William Toews* 5
- Effects of Modeling on Preservice Science Teachers During ISCS Microteaching Sessions: *Richard J. Rezba and Hans O. Andersen* 13
- The Proper Experimental Unit: Comparative Analyses of Empirical Data: *J. Dudley Herron, Thomas G. Luce, and Van E. Neie* 19
- Assessing Cognitive and Affective Outcomes of Environmental Education: *George R. Fleetwood and Paul B. Hounsheil* 29
- Adjunct Labeled Drawings in Teaching Physics to Junior High School Students: *William G. Holliday and Dahl A. Harvey* 37
- Development of a Science Attitude Scale for Spanish-Speaking Populations: *Elaine J. Anderson and Deyanira Barnett Herrera* 45
- The Effects of Plants on Classification Behavior in an Outdoor Environment: *Leonard R. Askham* 49
- The Relationship between Cooperation and Inquiry in Science Classrooms: *Roger T. Johnson* 55

Research Reports

- Using Value Sheets to Modify Attitudes toward Environmental Problems: *R. E. Quinn* 65
- Using College Chemistry to Influence Creativity: *Brenda W. Hill* 71
- Attitudes toward Science of Nonscience Major Undergraduates: Comparison with the General Public and Effect of a Science Course: *D. Sadava* 79

Comments and Criticism

- Some Comments on "A Regression Approach to Evaluating Instructional Programs in Science": *John T. McArthur* 85
- A Note on the Procedures for Deriving *F*-Values from Linear Regression Models: Response to McArthur: *C. H. Grobe* 87

ISSUE 2, MARCH

Research Papers

- Simulation Technique in the Teaching and Testing of Problem-Solving Skills: *Christine McGuire* 89
- Conceptualizing and Evaluating Learner Aptitudes Related to Instructional Stimuli in Science Education: *William G. Holliday* 101
- Attitudes toward Physics: Personal and Environmental Influences: *P. L. Gardner* 111
- The Effect of Grouping on Verbal Interaction during Science Inquiries: *Michael R. Abraham* 127
- A Test of the Association of Class Size to Students' Attitudes toward Science: *William H. Ward, Jr.* 137
- The Effects of Training in the Proportional Reasoning Associated with the Concept of Speed: *F. David Boulanger* 145
- Some Factors Affecting the Use of the Science Process Skill of Prediction by Elementary School Children: *Robert P. Thiel and Kenneth D. George* 155
- The Effect of the Position of Inserted Questions on Learning from an Activity-Centered Science Module: *Glenn Markle and William Capie* 167

Research Reports

- Attitudes of High School Students toward Science Instructional Procedures: *A. Joseph Santiesteban* 171
- The Development and Evaluation of a Televised Science Inservice Program: *Martha K. Piper and David P. Butts* 177
- Developing Divergent-Productive Thinking in Elementary School Children Using Attribute Games and Problems: *John Huntsberger* 185

ISSUE 3, MAY

Research Papers

- An Empirical Derivation of Hierarchies of Propositions Related to Ten of Piaget's Sixteen Binary Operations: *K. Elaine Benefield and William Capie* 193
- A Comparison of Achievement and Creativity of Elementary School Students using Project vs. Textbook Programs: *Terry Davis, Anne Raymond, C. Mac Rawls, and Janice Jordan* 205
- The Leveling Effect of Teacher Pacing on Science Content Mastery: *Marshall Arlin and Ian Westbury* 213
- The Structure-of-Intellect Model Applied to a COPES Learning Sequence: *Leon L. Ukens and Phillip R. Merrifield* 221

Research Reports

- Concrete and Formal Thinking Abilities in High School Biology Students as Measured by Three Separate Instruments: *Anton E. Lawson and Anthony J. D. Blake* 227
- The Effect of Grade Level on Achievement in Biology: *Arne A. Pedersen and Judith E. Jacobs* 237
- Validity and Reliability of the SCIS Test for the Organisms Unit: *Glen Richard Perry, Jr. and Dale G. Merkle* 243

- A Study of the Correlation between Elementary Student Teachers' Selection of Science Teaching Strategies and Average Class Ability and Size: *Russell Yeany, Jr.* 249
- How is Student Performance Affected by the One-to-One Teacher-Student Interactions Occurring in an Activity-Centered Science Classroom?: *James A. Shymansky* 253
- The Relationship between School and Student Variables and the Attitudes toward Science of Tenth-Grade Students in Israel: *Shimshon Novick and Dina Duvdvani* 259
- A Comparison of Structured and Unstructured Modes of Teaching Science Process Activities: *Robert K. Crocker, Kevin R. Bartlett, and Harry G. Elliott* 267
- Influence of Instrument Characteristics on Student Responses in Attitude Assessment: *Ronald D. Simpson, R. Robert Rentz, and John W. Shrum* 275

Comments and Criticism

- Comments on "The Effect of Direct Experience with Objects on Middle-Class, Culturally Diverse, and Visually Impaired Young Children": *Fred Hartford* 283
- Response to Mr. Hartford's Comments and Criticism: *Marcia Linn and Rita Peterson* 285

Erratum

- Botany and Zoology—A Curriculum Problem: *P. Tamir and E. Jungwirth* 287

ISSUE 4, JULY

Research Papers

- Studying the Effects of Two Quantitatively Defined Teaching Strategies on Student Behavior in Elementary School Science Using MACROanalytic Techniques: *John E. Penick, James A. Shymansky, Charles C. Matthews, and Ronald G. Good* 289
- Prior Knowledge or Advance Organizers as Effective Variables in Chemical Learning: *L. H. T. West and P. J. Fensham* 297
- Creativity in Fifth-Grade Science Students: The Effects of Two Patterns of Instruction: *John E. Penick* 307
- Student Perception of the Classroom Learning Environment in Biology, Chemistry, and Physics Courses: *Frances Lawrenz* 315

Research Reports

- The Correlation of Motivation and Academic Achievement in Physics: *Suzanne Winsberg and Louis Ste-Marie* 325
- Location of a Point in Euclidian Space by Children in Grades One Through Six: *Gaylen R. Carlson* 331
- Teacher Corps Preservice: A Study of Change in Science Teacher Behavior: *John T. Wilson, John J. Koran, Jr., and Mary Lou Koran* 337
- Analysis of Research on the Educational Uses of a Planetarium: *Dennis W. Sunal* 345

Comments and Criticism

- Commentary on "How Significant are Nonsignificant Differences?": *William G. Lamb* . . . 351
- A Note on the Comparison of Cognitive Structure and Subject-Matter Structure: *P. F. W. Preece* 353
- Commentary on "Piagetian Cognitive Development and Achievement in Science": *J. Dudley Herron* 355

- Comment on "An Analysis of Student Outcomes Utilizing Two Approaches in Teaching BSCS Biology": *William H. Leonard* 361

Position Papers

- Evaluation in Science Teaching: *Michael Scriven* 363
- A Status Report on the Study of Teacher Effectiveness: *David C. Berliner* 369

ISSUE 5, SEPTEMBER

Research Papers

- Information Processing and Pupil Achievement: A Model and a Study: *P. Eccles and G. J. A. DeLeeuw* 383
- The Karplus Islands Puzzle: Does It Measure Piagetian Operations?: *Anthony J. D. Blake, Anton E. Lawson, and Floyd H. Nordland* 397
- Development of a Test of Science Process Skills: *Loretta L. Molitor and Kenneth D. George* 405
- Encouraging the Transition from Concrete to Formal Cognitive Functioning—An Experiment: *Anton E. Lawson and Warren T. Wollman* 413
- The Association between Teacher Participation in NSF Institutes and Student Achievement: *Victor L. Willson and Antoine M. Garibaldi* 431

Research Reports

- Elementary School Teachers' Closed-Mindedness, Attitudes toward Science, and Congruence with a New Curriculum: *David J. Symington and Peter J. Fensham* 441
- Credibility of the Elementary Science Methods Course Instructor as Perceived by Students: A Model for Attitude Modification: *Robert L. Shrigley* 449
- Measuring Inquiry Attitudes of Secondary Science Teachers: *Reuven Lazarowitz and Addison E. Lee* 455
- The Factor Structure of Some Piagetian Tasks: *Anton E. Lawson and Floyd H. Nordland* . . . 461
- A Teaching Approach to Physical Chemistry: *Leon L. Combs* 467
- An Analysis of the Effects of a Component of Iowa-UPSTEP on Self-Concept: *Edward L. Pizzini* 473

ISSUE 6, NOVEMBER

Research Papers

- Effects of Generating Hunches on Subsequent Search Activity when Learning by Inquiry: *John T. Wilson and John J. Koran, Jr.* 479
- Relationships between Classroom Behavior and Instructional Outcomes in an Individualized Science Program: *Colin N. Power and Richard P. Tisher* 489
- A Study of the Teaching of Elementary Chemistry: *John Ruthven Hall* 499
- The Prediction of Student Attitude toward Science from Student Perception of the Classroom Learning Environment: *Frances Lawrenz* 509
- The Concepts of Electromagnetism: A Study of the Internal Representation of External Structures: *Peter F. W. Preece* 517

Research Reports

- Using Student Attitudes to Modify Instruction in Physics: *Roger Osborne* 525
- Relationships between Classroom Behavior and Cognitive Development Characteristics in Elementary School Children: *Ron Good, Charles Matthews, James Shymansky, and John Penick* 533
- Factors which Influence Student Achievement in High School Biology: *Pinchas Tamir* 539
- Does Use of Curriculum Change Teachers' Attitudes toward Inquiry?: *Reuven Lazarowitz* . 547
- Teacher Questioning Performance and Student Affective Outcomes: *A. Joseph Santiesteban* 553
- An Investigation of Two Formal-Operational Schemata in Adolescents Enrolled in ISCS Classrooms: *James P. Hale* 559
- A Study of the Nature of Incidental Physical Science Knowledge Possessed by Elementary School Children in Western State of Nigeria: *'Diran Taiwo* 565

Comments and Criticism

- A Comment Prompted by "Relationships of Science Subject Matter and Developmental Levels of Learners": *John Harris* 569
- Comment on "Science Misconceptions among Certain Groups of Students in Lebanon": *Marlene Milkent* 571
- Comment on "Sex Differences in Problem-Solving Ability": *Jerome L. Ciesla* 573
- Comment on "The Development of Criterion-Validated Test Items for Four Integrated Science Processes": *Richard P. Tolman* 575
- Comment on "The Development and Evaluation of a Televised Inservice Science Program": *Gerald S. Craig* 577

Position Papers

- Competing Paradigms in Science Education Research: *Colin N. Power* 579
